

Wildlife Undercrossings

Background

Along the roads, you'll find more than 60 wildlife undercrossings, bridges and culverts that allow for connectivity of the landscape utilized by wildlife in the area. These undercrossings and the surrounding areas are monitored with strategically placed motion-sensor cameras to document how wildlife use the undercrossings.

QUICK FACTS:

- Number:** 14 crossings
- Acquired:** 1996
- Agency:** F/ETCA and SJHTCA
